

Water Balloon Drop Event 5

Each pilot will be given 3 (three) balloons, a foam cup, popsicle sticks and rubber bands to make a bomb rack if he wishes. Pilot may build a bomb rack out of any material he would like, but it must pass a safety inspection by the CD.

Each pilot will fill his balloons with water to any level that he thinks is best. If your balloon does not break when it hits the ground, the place where it stops rolling will be the hit location. There are three concentric rings on the runway. A hit inside the first ring is 10 points, inside the second ring is 7 points, and inside the third ring is 4 points, any hit on the runway is 1 point. If you hit the CD that is good for a free lunch.

If your balloon breaks before you get off the ground that may not be an official attempt and you could get a replacement balloon. CD is the final judge of the flight status at the time of balloon failure.

Point scoring: pilot with the most hit points

1st place 10 points

2nd place 7 points

3rd place 5 points

4th place 3 points

5th place 2 points

All places past 5th is 1 point
