

Pylon race with a twist
Event 3
For all aircraft glow, and electric.

There will be one pylon set up on each end of the runway.

There will up to 4 aircraft in each race, but not less than 2.

The aircraft will be parked on the east side of the runway. The glow and electric aircraft will have the prop removed. The pilots will take their prop and prop-nut to the other side of the runway.

The pilot will hold their prop by one blade and balance the prop nut on the other blade.

At the start horn, each pilot will cross the runway while balancing their hardware. If dropped, the hardware must be picked it up and rebalanced.

Place the parts on their aircraft, start the motor/engine and fly around the two pylons, twice and land. Return back to the spot where they put the parts on their aircraft, and remove the parts.

Signaling completing the race by put their hand with the prop and nut up in the air.

Point scoring: by fastest time

1st 10 points

2nd 7 points

3rd 5 points

4th 3 points

5th 2 points

All past 5th place is 1 point
